## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Specification***

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Claim Objections***

3. Claim 8 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Art Unit: 3723

***Claim Rejections - 35 USC § 112***

4. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. The claims 1-8 are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

The following phrases are examples of the errors in the claims that are vague, indefinite, and/or awkwardly and confusingly worded:

I. "the spectacle frame " (claim 1, line 2). Lacks proper antecedent basis.

II. "the lens shape" (claim 5, line 6). Lacks proper antecedent basis.

III. "the result of measurement" (claim 6, lines 6-7). Lacks proper antecedent basis.

IV. "the machining conditions for the unprocessed spectacle lens" (claim 7, lines 3-4). The phrase is awkward because it is duplicate of the phrase in lines 2-3.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

Art Unit: 3723

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

7. Claims 1, 2, and 5-7 are rejected as best understood by the examiner under 35

U.S.C. 102(e) as being anticipated by Gottschald.

Gottschald discloses a lens shape data processing apparatus comprising: a storage means (column 1, lines 44-67 [the computer]; and [7]), a measuring unit (column 1, lines 44-67 [the potentiometers]; and [column 8, lines 38-47]), an arithmetic processing means (column 1, lines 44-67 [the computer]), a display means (38), a plurality of keys (2), and a machining means (6).

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 3, 4, and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gottschald.

Gottschald discloses as discussed above.

Gottschald does not disclose the specific programmed function of the keys in the display means.

Art Unit: 3723

The specific function of the keys would have been obvious to one having ordinary skill in the art at the time the invention was made, since it is within the general skill of the worker in the art to program a computer to perform a desired task on the basis of its suitability for the user's preference as an obvious matter of design choice.

***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
